

CONTRACT

June 3, 2004

Prepared for:

Scott County

To Provide

Updates to Parcels

OVERVIEW

WTH Engineering, Inc. (the "Company") wishes to offer additional mapping services to Scott County (the "Client"). The following defines the scope of products and services to be offered by the Company and the compensation to be paid by the Client.

DESCRIPTION OF PRODUCTS AND SERVICES

Updating Parcels Layer

The Company will perform all the parcel splits that date back to 2002 that have not been completed since the Think Map layer was created. The Client states there are approximately 250 known splits and may be as many as 500 splits to be done. The Client must provide paper copy of the legal description of the split and any other documentation (e.g. legal survey). If a new parcel number has not been assigned, a new number will be automatically generated in Think Map. This number will be provided to the County so it can be matched up to the parcel database the Client uses. The splits will be created in the latest parcel layer that is in Client's Think Map data archive. Once all the splits are finished, the parcel layer will be forwarded to the Client for installation on the Client's local system.

The first 250 parcels splits will be completed for a fee of \$6,500. Parcel splits above the basis figure of 250 will be completed for a fee of \$20.00 per parcel split.

The company is projecting a completion time-line for this project of 45 days from receipt of all source material.

LIMITATION OF LIABILITY

In no event shall either party be liable to the other for any indirect, special, or consequential damages or lost profits arising out of or related to this agreement or the performance of breach thereof, even if such party has been advised of the possibility thereof.

The Company takes no responsibility for the accuracy of source data provided by the Client or for any errors resulting from any inaccuracies. It is the responsibility of the Client to review the data for accuracy.
